Email: shivam.tech.mn@gmail.com

PERSONAL DETAILS

- Current Location Noida, Uttar Pradesh
- Date of Birth May 5, 2003
- Gender Male

SKILLS

- Java
- Spring Boot
- SQL
- Object
- Framework
- Software Development
- React.js
- Hibernate
- Class
- JPA
- ASP.NET MVC
- ASP.NET Web API
- Javascript
- JDBC
- Rest APIs

LANGUAGES KNOWN

- English (Both)
- Hindi (Both)

CERTIFICATIONS

- Java Developer
- HTML5 & CSS3
- Web Development with React

ACHIEVEMENTS

- Received scholarship in school

EDUCATION

Graduation

Course	B.Tech / B.E. (CSE)
College	IMS Engineering College, Ghaziabad
Score	7.01%

Class XII

Board Name	Uttar Pradesh
Medium	Hindi
Year of Passing	2019
Percentage	63%

Class X

Board Name	Uttar Pradesh
Medium	Hindi
Year of Passing	2017
Percentage	77.66%

INTERNSHIPS

Flexsin Technologies, May 2025 - July 2026

- During my internship, I worked on the backend development of a Bank Management System using Java, Spring Boot, Spring Data JPA, Hibernate, and MySQL. I designed and implemented RESTful APIs for core banking operations, including account creation, balance inquiry, cash deposit, cash withdrawal, and fund transfer. I integrated MySQL for secure data storage and used JPA/Hibernate for efficient database interactions. I implemented input validation, exception handling, and business logic to ensure accurate and reliable transaction processing. I also tested APIs using Postman, fixed bugs, and optimized application performance. Throughout the internship, I followed clean coding practices, collaborated with team members using Git, and gained practical experience in building scalable, database-driven backend applications.

First Miles IT Service Inc, July 2024 - August 2024

PROJECTS

Bank Management System , July 2024 - August 2024

- Project: Bank Management System

Description:

Developed a secure Bank Management System using Java, Spring Boot, Spring Data JPA, Hibernate, and MySQL. Implemented RESTful APIs for core banking operations, including account creation, balance inquiry, cash deposit, cash withdrawal, and fund transfer. Designed a relational database for customer and transaction management, integrated JPA/Hibernate for data persistence, and implemented input validation, exception handling, and role-based authentication. Used Postman for API testing and Git for version control while following clean coding practices and object-oriented design principles.
